Summary

B. Tech Computer Science Graduate, hands on experience on projects like Eduma ERP system. Skilled in MySQL, Python, C++, and their tools. Along with I have knowledge of SDLC methodology. Seeking Entry Level Business Analyst role to contribute to process improvement and business solutions.

Skills

- **Business Analysis:** Reconnaissance, Requirement Gathering & Analysis, SDLC methodology.
 - **Data & Databases:** MySQL, MongoDB.
 - **Language:** Python, C++, SQL.
 - **Tools:** GitHub, Postman, Git.
-

ACADEMIC PROJECTS

Eduma – ERP System for Academic Management

Technologies: Django, Python, REST APIs, MySQL

- Analysed academic administration requirements and designed a full-stack ERP solution supporting **Admin, Staff, and Student** user roles.
 - Defined role-specific workflows for student records, courses, sessions, attendance, results, leave applications, and feedback management.
 - Designed and implemented REST APIs to support structured data exchange between frontend and backend systems.
 - Implemented **role-based access control (RBAC)** to ensure users could access data according to their responsibilities and permissions.
 - Worked with MySQL to structure, manage, validate, and retrieve application data.
-

EDUCATION

Uttarakhand Technical University — Dehradun, Uttarakhand

B. Tech – Computer Science Engineering (73.6%)

Relevant Coursework: Software Engineering, Operating Systems, Algorithms

CERTIFICATIONS

Coding for Everyone – Python & C++ — GeeksforGeeks, 2025

Advanced C++ (COP) — IIT Bombay, 2022

Python Programming — NIELIT, 2022
